## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-30, drawn to an apparatus (a sensing system for a vehicle), classified in class 701, subclass 45.
  - II. Claims 31-43, drawn to a method (a discrimination method for a vehicle), classified in class 180, subclass 271.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as a sensing system for sensing the desired side slippage or desired damping ratio to control the vehicle stability enhancement (VSE) system.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3663

4. Upon election of invention I or II, the applicant is further required under 35 U.S.C. 121 to elect on of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- (A) The embodiment of Fig. 2 (fire/no-fire discrimination system).
- (B) The embodiment of Fig. 6 (a transmission checking).
- (C) The embodiment of Fig. 7 (correlation acceleration difference (CAD) algorithm).
- (D) The embodiment of Fig. 10 (runtime reduction).
- (E) The embodiment of Fig. 11 (a plausibility check).
- 5. Upon election of species A, B, C, D, or E, the applicant is further required under 35 U.S.C. 121 to elect on of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

Application/Control Number: 10/764,256 Page 4

Art Unit: 3663

(1) The acceleration signal exceeds height and width thresholds.

- (2) A relative pressure change exceeds at least on of a fixed and a dynamic threshold.
- (3) A mean pressure exceeds a dynamic threshold.
- 6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement (e.g., I, A and (1)), and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LUU MATTHEW whose telephone number is (571) 272-7663. The examiner can normally be reached on Flexible Schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JACK KEITH can be reached on (571) 272-7663. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
